The Moorings Bradwell Creek

All boat owners with a mooring in the creek will be aware of the importance of regular maintenance. At the start of every season it is vital that mooring is inspected to ensuring that ground chains and the riser are in good order. Particular attention should also be given to swivels and shackles as these tend to be the weak points. The shackle pins can roll out or the swivel pin rust away at the pivot point which results in the boat breaking away.

Eleven boats had to be rescued last year.

An inspection and perhaps a bit of maintenance would have avoided this occurring in virtually every instance.

Fortunately Bradwell Outdoors have able to offer an inspection service so theres no excuse.

The advantage of Bradwell Outdoors doing your inspection is that you have a mooring which is in good order together with a report of the action. This report could prove invaluable in the event of an subsequent insurance claim.

Mooring Inspection

01621 776256

Bradwell Quay Yacht Club has had involvement with the moorings at waterside for more than 50 years.

In partnership with Essex County Council and Bradwell Outdoors the Yacht Club allocates mooring and supervises activities in the creek through its participation in the Fairways committee.

In addition the Yacht Club operates its own scrubbing and maintenance posts.

Positioned conveniently next to the slip the maintenance posts in Bradwell Creek are available for the use of club members and visitors alike. So irrespective of whether you are a mooring license holder, occupy a marina berth or simply visiting, the club invites you to make use of the facility. However use of the maintenance posts is of course by prior arrangement only.

Please telephone and reserve your place on **01268 772266**.

This number is office hours with answer phone back up. Remember you must book in advance and there is a small fee. Simply telephone or call into the club house for information.
